Projects RADAR Smart Solution for Project Status Reporting

Project RADAR is a compact, easy to use tool for project status reporting.

RADAR allows showing the global snapshot of all projects data at one screen, which can be used for presentations, reporting, live conferences and many other purposes. You will be able to present the whole complicated picture at one window with an easy to understand look.

And even more: you can use it not just for presentations, but also for controlling your projects – you receive your personal project management dashboard right on your screen and as print outs.

Top Features:

- Control your project status and progress
- Design your status reporting with advanced RADAR visualization
- Access project details with a single click
- Share your RADAR report with other people in your network or via the Internet including mobile devices and print outs
- Benefit from the interface to the market leading project management systems for Windows and Macintosh

Get Projects Controlled in Four Easy Steps

1.

Customize RADAR

- Look & feel, colors
- Project fields
- Process & milestones
- Project types & icons

2.

Setup Projects

- Add & delete projects
- Show & hide projects
- Import & export data
- Update project status

3.

Publish Project Status

- Publish RADAR to your network or Internet
- Email a link to your stakeholders
- Protected access

4.

Get Reporting

- Online, mobile or paper based project status reporting
- Local and global access
- Get projects controlled

MENU
Setup, publish or print out your project status reporting

RADAR
Report project portfolio status at one interactive radar display
